SUMMARY SECTION

Investment Objective

The BHILL Fund (the “Fund”) seeks capital appreciation and income.

Fees and Expenses of the Fund

The following table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and the Example below.**

Annual Fund Operating Expenses <i>(expenses that you pay each year as a percentage of the value of your investment)</i>	
Management Fees	0.00%
Distribution and Service (Rule 12b-1) Fees	None
Other Expenses ¹	0.41%
Acquired Fund Fees and Expenses ¹	0.59%
Total Annual Fund Operating Expenses After Expense Reimbursements	1.00%
Expense Reimbursements ²	-0.41%
Total Annual Fund Operating Expenses	0.59% ³

¹ Based on estimated expenses for the current fiscal year.

² The Fund’s investment advisor, Bramshill Investments, LLC (“Bramshill” or the “Advisor”), has contractually agreed to pay or reimburse all expenses of the Fund, except certain expenses, indefinitely. Excluded expenses include dividend expense, interest expense, acquired fund fees and expenses, and certain other Fund expenses listed in the expense limitation agreement, which may only be terminated by the Advisor with the consent of the Board of Trustees of Advisor Managed Portfolios (the “Board”).

³ The Fund is an investment option for certain “wrap-fee” programs or other separately managed account clients for which the Advisor receives compensation pursuant to separate management agreements. Wrap-fee program participants pay a “wrap-fee” to the sponsor of the program, which typically covers investment advice and transaction costs on trades executed with the sponsor or designated broker-dealers. You should read carefully the wrap-fee or other program brochure provided to you by your program sponsor or investment advisor. The brochure is required to include information about the fees charged to you and, in case of a wrap-fee program, the fees paid by the sponsor to the Advisor. For additional information regarding separately managed account/wrap fees, please refer to the wrap brochure from the Advisor and/or your wrap-fee program sponsor.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The amounts calculated in the Example would be the same even if the assumed investment was not redeemed at the end of each period. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same (taking into account the expense reimbursement for the first year of each period). Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years
\$60	\$234

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance.

Because the Fund is newly organized, portfolio turnover information is not yet available.

Principal Investment Strategies of the Fund

The Fund generally invests in a mix of mutual funds, exchange-traded funds (“ETFs”), and closed-end funds that invest in domestic fixed income securities and may also make direct investments in such fixed income securities. From time to time, the Fund may maintain up to 100% of its assets in a single mutual fund, ETF, or closed-end fund. The Fund’s direct and indirect fixed income holdings may include investment-grade U.S. corporate bonds, asset-backed securities, mortgage-backed securities, high yield (i.e., junk bonds), preferred stocks, variable- and floating-rate instruments, municipal bonds, and U.S. Treasuries. The Fund implements a tactical fixed income strategy that seeks to maximize total return across different types of fixed income products and, based on market conditions, may also hold cash and cash equivalents. The Fund’s investments are comprised of an actively managed portfolio of income-producing securities. The Fund may also invest up to 10% of its assets in securities of foreign issuers of U.S. dollar denominated fixed income securities. The Fund may invest up to 100% of its assets in high yield bonds (i.e., junk bonds), which are defined as corporate bonds rated below Baa by Moody’s, or equivalently rated by S&P or Fitch, or, if unrated, determined by the Advisor to be of comparable quality.

The Fund may invest in fixed-income securities of any duration, maturity or quality. Bramshill periodically shifts the portfolio’s duration opportunistically seeking to generate alpha in both falling and rising interest rate environments. Duration is a measure of the sensitivity of a fixed income security’s price to changes in interest rates that incorporates a security’s yield, coupon, final maturity, and call features, among other characteristics. The longer a fixed-income security’s duration, the more sensitive it will be to changes in interest rates. For example, if interest rates were to rise by 1% the price of a fixed income security with a duration of 5 years would be expected to fall 5% and, if interest rates were to fall by 1%, the price of the security would be expected to rise by 5%. Maturity is the date on which a fixed-income security becomes due for payment of principal. In order to hedge certain risks, the Fund may invest in futures contracts, which are a type of derivative instrument. Floating rate instruments reset their interest rate periodically over a base rate, with rates tied to a representative interest rate index (for example, the Treasury Note Constant Maturity Rate).

The Fund may engage in frequent and active trading as part of its principal investment strategies. The Fund is classified as non-diversified, which means it may invest a larger percentage of its assets in a smaller number of issuers than a diversified fund.

Principal Risks of Investing in the Fund

Losing all or a portion of your investment is a risk of investing in the Fund. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. As with any mutual fund, there is no guarantee that the Fund will achieve its investment. Following is a summary of principal risks of investing in the Fund. The relative significance of each risk factor may change over time and you should review each factor carefully. These risks could affect the value of your investment:

Credit Risk

The risk that issuers of fixed income securities in which the Fund invests experience unanticipated financial problems causing their securities to decline in value. Changes in the market’s perception of the issuer’s financial strength or in a security’s credit rating, which reflects a third party’s assessment of the credit risk presented by a particular issuer, may affect debt securities’ value. In addition, the Fund is subject to the risk that the issuer of a fixed income security will fail to make timely payments of interest or principal, or may stop making such payments altogether.

Interest Rate Risk

When interest rates increase, fixed income securities generally will decline in value and, as a result, an increase in interest rates may result in a decrease in the value of debt securities held by the Fund. Conversely, as interest rates decrease, the prices of fixed income securities tend to increase. The price volatility of a debt security also depends on its maturity. Longer-term securities are generally more volatile, so the longer the average maturity or duration of these securities, the greater their price risk. Duration is a measure used to determine the sensitivity of a security’s price to changes in interest rates that incorporates a security’s yield, coupon, final maturity, and call

features, among other characteristics. The longer a fixed-income security's duration, the more sensitive it will be to changes in interest rates. Maturity, on the other hand, is the date on which a fixed-income security becomes due for payment of principal. Recent and potential future changes in government policy may affect interest rates.

Floating Rate Securities Risk

The interest rates payable on floating rate securities are not fixed and may fluctuate based upon changes in market rates. The interest rate on a floating rate security is a variable rate which is tied to another interest rate, such as the Treasury Note Constant Maturity Rate. The absence of an active market for these securities could make it difficult for an owner to dispose of them if the issuer defaults.

ETF Risk

Because the Fund may invest in ETFs, it is subject to additional risks that do not apply to conventional mutual funds, including the risks that the market price of an ETF's shares may trade at a discount to its NAV. An active secondary trading market may not develop or be maintained, or trading may be halted by the exchange in which the ETFs trade, which may impact the Fund's ability to sell its shares of an ETF. The Fund may pay brokerage commissions in connection with the purchase and sale of shares of ETFs. An investment in an ETF is an investment in another investment company and therefore, the Fund's shareholders will indirectly bear a proportionate share of any fees and expenses of the ETFs in which the Fund invests.

To the extent that all or a portion of an ETF's underlying securities trade in a market that is closed when the market in which the ETF's shares are listed and trading is open, there may be changes between the last quote from the closed foreign market and the value of such security during the ETF's domestic trading day. In turn, this could lead to differences between the market price of the ETF's shares and the underlying value of its shares.

Investment-Grade Debt Securities Risk

Investment-grade debt securities may be downgraded by a nationally recognized statistical rating organization ("NRSRO") to below-investment-grade status, which would increase the risk of holding these securities. Investment-grade debt securities rated in the lowest rating category by a NRSRO involve a higher degree of risk than fixed-income securities with higher credit ratings.

U.S. Government Securities Risk

U.S. government securities, which may be backed by the U.S. Department of the Treasury or the full faith and credit of the U.S., and may include U.S. Treasury bills, Treasury Inflation-Protected Securities, notes and bonds, are guaranteed only as to the timely payment of interest and principal when held to maturity. The market prices for such securities are not guaranteed and will fluctuate. Certain U.S. government agency securities are backed by the right of the issuer to borrow from the U.S. Department of the Treasury, or are supported only by the credit of the issuing agency or instrumentality, and in some cases there may be some risk of default by the issuer.

Asset-Backed Securities Risk

Asset-backed securities are fixed-income securities backed by other assets such as credit card, automobile or consumer loan receivables, retail installment loans, or participations in pools of leases. The values of these securities are sensitive to changes in the credit quality of the underlying collateral, the credit strength of any credit enhancement feature, changes in interest rates, and, at times, the financial condition of the issuer.

Mortgage-Backed Securities Risk

Mortgage-backed securities are fixed-income securities representing an interest in a pool of underlying mortgage loans. Mortgage-backed securities are sensitive to changes in interest rates, but may respond to these changes differently from other fixed-income securities due to the possibility of prepayment of the underlying mortgage loans. Mortgage-backed securities may fluctuate in price based on deterioration in the value of the collateral underlying the pool of mortgage loans, which may result in the collateral being worth less than the remaining principal amount owed on the mortgages in the pool.

Corporate Loan Risk

The corporate loans, commonly referred to as bank loans, in which the Fund invests may be rated below investment grade. As a result, such corporate loans will be considered speculative with respect to the borrowers' ability to make payments of interest and principal and will otherwise generally bear risks similar to those

associated with non-investment grade securities. There is a high risk that the Fund could suffer a loss from investments in lower rated corporate loans as a result of a default by the borrower. Direct investments in loans may be illiquid and holding a loan could expose the Fund to the risks of being a direct lender.

Prepayment and Extension Risk

When interest rates fall, issuers of high interest debt obligations may pay off the debts earlier than expected (prepayment risk), and the owner may have to reinvest the proceeds at lower yields. When interest rates rise, issuers of lower interest debt obligations may pay off the debts later than expected (extension risk), thus keeping the assets tied up in lower interest debt obligations.

Preferred Stock Risk

Preferred stocks in which the Fund may invest are sensitive to interest rate changes, generally decreasing in value if interest rates rise and increasing in value if interest rates fall. Preferred stocks are also subject to equity risk, which is the risk that stock prices will fall over short or extended periods of time and credit risk, which is the possibility that an issuer of preferred stock will fail to make its dividend payments.

Call Risk

During a period of falling interest rates, the issuer may redeem a security by repaying it early, which may reduce income if the proceeds are reinvested at lower interest rates.

Other Investment Companies Risk

The Fund's investments in other investment companies, including ETFs and closed-end funds, will be subject to substantially the same risks as those associated with the direct ownership of the securities comprising the portfolios of such investment companies, and the value of the Fund's investment will fluctuate in response to the performance of such portfolios. In addition, if the Fund acquires shares of other investment companies, shareholders of the Fund will bear both their proportionate share of the fees and expenses of the Fund (including management and advisory fees) and, indirectly, the fees expenses of the other investment companies.

Closed-End Fund Risk

Shares of closed-end funds frequently trade at a price per share that is less than the net asset value ("NAV") per share. There can be no assurance that the market discount on shares of any closed-end fund purchased by the Fund will ever decrease or that when the Fund seeks to sell shares of a closed-end fund it can receive the NAV of those shares. Closed-end funds have lower levels of daily volume when compared to open-end companies. There are greater risks involved in investing in securities with limited market liquidity. To the extent the Fund invests in closed-end funds, it will indirectly bear its proportionate share of any fees and expenses payable directly by the closed-end fund. Therefore, the Fund would incur higher expenses, which may be duplicative, than if the Fund did not invest in closed-end funds.

High Yield Securities Risk

Securities that are rated below investment grade (*i.e.*, "junk bonds") are subject to additional risk factors due to the speculative nature of the securities, such as increased possibility of default, liquidation of the security, and changes in value based on public perception of the issuer.

Distressed or Defaulted Securities Risk

Investments in defaulted securities and obligations of distressed issuers, including securities that are, or may be, involved in reorganizations or other financial restructurings, either out of court or in bankruptcy, involve substantial risks in addition to the risks of investing in high-yield debt securities. These securities are considered speculative with respect to the issuers' continuing ability to make principal and interest payments. Additional risks include the cost to protect the investment, and an investment could become worthless. Distressed securities and any securities received in an exchange for such securities may be subject to restrictions on resale.

Management Risk

Management risk describes the Fund's ability to meet its investment objective based on the Advisor's success or failure to implement investment strategies for the Fund. The Fund is subject to the risk that the manager's selection of portfolio holdings suffer disproportionately by the poor performance of any one holding or that the Fund underperforms other funds with a similar investment objective.

Municipal Securities Risk

Investing in municipal securities may involve risk related to the ability of the municipalities to continue to meet their obligations for the payment of interest and principal when due. Any adverse economic conditions or developments affecting the states or municipalities that issue the municipal securities in which the Fund invests could negatively impact the Fund.

Non-diversification risk.

The Fund is classified as “non-diversified,” which means it may invest a larger percentage of its assets in a smaller number of issuers than a diversified fund. To the extent the Fund invests its assets in a smaller number of issuers, the Fund will be more susceptible to negative events affecting those issuers than a diversified fund. However, the Fund intends to satisfy the asset diversification requirements under Subchapter M of the Internal Revenue Code of 1986, as amended (the “Code”) for classification as a regulated investment company (“RIC”).

Derivatives Risk

The use of derivative instruments exposes the Fund to additional risks and transaction costs. A risk of the Fund’s use of derivatives is that the fluctuations in their values may not correlate perfectly with the overall securities markets.

Rule 18f-4 under the 1940 Act provides a comprehensive regulatory framework for the use of derivatives by funds and imposes requirements and restrictions on funds using derivatives. The rule may not effectively limit the risk of loss from derivatives.

Futures Contract Risk. The primary risks associated with the use of futures contracts are (a) the imperfect correlation between the change in market value of the instruments held by the Fund and the price of the forward or futures contract; (b) possible lack of a liquid secondary market and the resulting inability to close or futures contract when desired; (c) losses caused by unanticipated market movements, which are potentially unlimited; (d) the Advisor’s inability to predict correctly the direction of securities prices, interest rates, currency exchange rates and other economic factors; and (e) if the Fund has insufficient cash, it may have to sell securities from its portfolio to meet daily variation margin requirements, and the Fund may have to sell securities at a time when it may be disadvantageous to do so.

Leverage Risk. Derivative instruments provide the economic effect of financial leverage by creating additional investment exposure, as well as the potential for greater loss. If the Fund uses leverage through derivative instruments, the Fund has the risk of losing more than its original investment. The net asset value (“NAV”) of the Fund when employing leverage will be more volatile and sensitive to market movements.

Market Risk

Financial market risks affect the value of individual instruments in which the Fund invests. When the value of the Fund’s investments goes down, your investment in the Fund decreases in value and you could lose money. Factors such as economic growth and market conditions, interest rate levels, and political events affect the markets. Periods of market volatility may occur in response to market events and other economic, political, and global macro factors (for example, a global pandemic such as COVID-19, the large expansion of government deficits and debt, military conflicts, inflation, and/or recessions). These and other similar events could be prolonged and could adversely affect the value and liquidity of the Fund’s investments, impair the Fund’s ability to satisfy redemption requests, and negatively impact the Fund’s performance.

Economies and financial markets throughout the world are becoming increasingly interconnected. As a result, whether or not the Fund invests in securities of issuers located in or with significant exposure to countries experiencing economic and financial difficulties, the value and liquidity of the Fund’s investments may be negatively affected.

Foreign Securities and Companies Risk

Foreign securities traded on U.S. exchanges and dollar denominated securities of foreign issuers involve special risks such as economic or financial instability, lack of timely or reliable financial information and unfavorable political or legal developments. Foreign securities also involve risks such as currency fluctuations and delays in enforcement of rights.

Portfolio Turnover Risk

As a result of its active trading strategy, the Fund may incur higher levels of brokerage fees and commissions, and cause higher levels of current tax liability to shareholders in the Fund.

Cybersecurity Risk

Cybersecurity incidents may allow an unauthorized party to gain access to Fund assets, customer data (including private shareholder information), or proprietary information, or cause the Fund, its advisor and/or its other service providers (including, but not limited to, fund accountants, custodians, sub-custodians, transfer agents and financial intermediaries) to suffer data breaches, data corruption or lose operational functionality.

Performance

The Fund is new and, therefore, does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's returns and comparing the Fund's performance to a broad measure of market performance. Updated performance information will be available on the Fund's website at www.bramshillfunds.com.

Management

Investment Advisor: Bramshill Investments, LLC is the Fund's investment advisor.

Portfolio Managers:

Art DeGaetano and Derek Pines are the Senior Portfolio Managers jointly and primarily responsible for the day-to-day management of the Fund since inception in April 2025.

Purchase and Sale of Fund Shares

Shares of the Fund may be purchased and held only by eligible investors. Eligible investors may purchase or redeem Fund shares on any business day by written request via mail to BHILL Fund, c/o U.S. Bank Global Fund Services, P.O. Box 701, Milwaukee, Wisconsin 53201-0701, by telephone at 877-BRAMS18 or 877-272-6718, by wire transfer, or through a financial intermediary. Investors who wish to purchase or redeem Fund shares through a financial intermediary should contact the financial intermediary directly. The minimum initial and subsequent investment amounts are shown below. The minimum initial and subsequent investment may be modified for certain financial firms that submit orders on behalf of their customers.

Only the following purchasers are eligible to invest in, or own the Fund: (a) investment advisory clients of the Advisor, (b) participants in "wrap-fee" programs sponsored by investment advisors unaffiliated with the Fund or the Advisor that are advised by the Advisor, (c) clients of affiliated companies of the Advisor and (d) employees of the Advisor.

There is no minimum amount for initial investments and there is no minimum amount for additional investments. Your financial intermediary may impose different investment minimums. Please contact them for additional details.

Tax Information

The Fund's distributions are taxable, and will be taxed as ordinary income, qualified dividend income or capital gains, unless you invest through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account ("IRA"). Distributions on investments made through tax-advantaged arrangements may be taxed later upon withdrawal of assets from those accounts.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase the Fund through a broker-dealer or other financial intermediary, the Advisor may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

INVESTMENT OBJECTIVE, PRINCIPAL INVESTMENT STRATEGIES AND PRINCIPAL RISKS

Investment Objective

The Fund seeks capital appreciation and income. The Fund's objective is not fundamental and may be changed without shareholder approval.

Principal Investment Strategies

The Fund generally invests in a mix of mutual funds, exchange-traded funds ("ETFs"), and closed-end funds that invest in domestic fixed income securities and may also make direct investments in such fixed income securities. From time to time, the Fund may maintain up to 100% of its assets in a single mutual fund, ETF, or closed-end fund. The Fund's direct and indirect fixed income holdings may include investment-grade U.S. corporate bonds, asset-backed securities, mortgage-backed securities, high yield (i.e., junk bonds), preferred stocks, variable- and floating-rate instruments, municipal bonds, and U.S. Treasuries. The Fund implements a tactical fixed income strategy that seeks to maximize total return across different types of fixed income products and, based on market conditions, may also hold cash and cash equivalents. The Fund's investments are comprised of an actively managed portfolio of income-producing securities. The Fund may also invest up to 10% of its assets in securities of foreign issuers of U.S. dollar denominated fixed income securities. The Fund may invest up to 100% of its assets in high yield bonds (i.e., junk bonds), which are defined as corporate bonds rated below Baa by Moody's, or equivalently rated by S&P or Fitch, or, if unrated, determined by the Advisor to be of comparable quality.

The Fund may invest in fixed-income securities of any duration, maturity or quality. Bramshill periodically shifts the portfolio's duration opportunistically seeking to generate alpha in both falling and rising interest rate environments. Duration is a measure of the sensitivity of a fixed income security's price to changes in interest rates that incorporates a security's yield, coupon, final maturity, and call features, among other characteristics. The longer a fixed-income security's duration, the more sensitive it will be to changes in interest rates. For example, if interest rates were to rise by 1% the price of a fixed income security with a duration of 5 years would be expected to fall 5% and, if interest rates were to fall by 1%, the price of the security would be expected to rise by 5%. Maturity is the date on which a fixed-income security becomes due for payment of principal. In order to hedge certain risks, the Fund may invest in futures contracts, which are a type of derivative instrument. Floating rate instruments reset their interest rate periodically over a base rate, with rates tied to a representative interest rate index (for example, the Treasury Note Constant Maturity Rate).

Bramshill seeks to identify relative value across asset classes and capture opportunities primarily within the corporate, U.S. Treasury, municipal and preferred security markets.

At any time the Fund may hold up to 100% of its assets in one of the income generating asset classes and the Fund may engage in frequent and active trading as part of its principal investment strategies. The Fund is classified as non-diversified, which means it may invest a larger percentage of its assets in a smaller number of issuers than a diversified fund.

The Fund may, from time to time, take temporary defensive positions that are inconsistent with its principal investment strategies in attempting to respond to adverse market, economic, political or other conditions. During such periods, all of the Fund's assets may be invested in short-term, high-quality fixed income securities, money market instruments, cash or cash equivalents. When the Fund takes temporary defensive positions, it may not achieve its investment objective.

Principal Risks

Losing all or a portion of your investment is a risk of investing in the Fund. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The following risks could affect the value of your investment:

Credit Risk

If issuers of fixed income securities in which the Fund invests experience unanticipated financial problems, their issue is likely to decline in value. Changes in the market's perception of the issuer's financial strength or in a

security's credit rating, which reflects a third party's assessment of the credit risk presented by a particular issuer, may affect debt securities' value. In addition, the Fund is subject to the risk that the issuer of a fixed income security will fail to make timely payments of interest or principal, or may stop making such payments altogether.

Interest Rate Risk

Interest rate changes may affect the value of a debt instrument indirectly (especially in the case of fixed rate debt securities) and directly (especially in the case of instruments whose rates are adjustable). When interest rates increase, fixed income securities generally will decline in value and, as a result, an increase in interest rates may result in a decrease in the value of debt securities held by the Fund. Conversely, as interest rates decrease, the prices of fixed income securities tend to increase. The Federal Reserve has raised interest rates from historically low levels. Any additional interest rate increases in the future may cause the value of fixed-income securities to decrease. The price volatility of a debt security also depends on its maturity. Longer-term securities are generally more volatile, so the longer the average maturity or duration of these securities, the greater their price risk. Duration is a measure used to determine the sensitivity of a security's price to changes in interest rates that incorporates a security's yield, coupon, final maturity, and call features, among other characteristics. The longer a fixed-income security's duration, the more sensitive it will be to changes in interest rates. Maturity, on the other hand, is the date on which a fixed-income security becomes due for payment of principal. Recent and potential future changes in government policy may affect interest rates.

Floating Rate Securities Risk

The interest rates payable on certain fixed income securities in which the Fund may invest are not fixed and may fluctuate based upon changes in market rates. The interest rate on a floating rate security is a variable rate which is tied to another interest rate. Additionally, such securities may fluctuate in value in response to interest rate changes if there is a delay between changes in market interest rates and the interest reset date for the obligation, or for other reasons. Floating rate securities are less effective at locking in a particular yield and are subject to credit risk. The absence of an active market for these securities could make it difficult for the Fund to dispose of them if the issuer defaults.

ETF Risk

Shares of ETFs are typically purchased and sold on a securities exchange. Generally, an ETF represents a portfolio of securities designed to track a particular market segment or index. Because the Fund invests in ETFs, it is subject to additional risks that do not apply to conventional funds, including the risk that the market price of the ETF's shares may trade at a discount to their NAV. Also, an active secondary trading market for an ETF's shares may not develop or be maintained, or trading of an ETF's shares may be halted if the listing exchange deems such action appropriate. This could lead to a lack of market liquidity, thereby forcing the Fund to sell its shares in an ETF for less than the shares' NAV. Further, an ETF's shares may be delisted from the securities exchange on which they trade. An ETF may fail to accurately track the market segment or index that underlies its investment objective, and ETFs are subject to the risks of the underlying securities or sectors the ETF is designed to track. The Fund will pay brokerage commissions in connection with the purchase and sale of shares of ETFs. An investment in an ETF is an investment in another investment company and therefore, the Fund's shareholders will indirectly bear a proportionate share of any fees and expenses of the ETFs in which the Fund invests.

To the extent that all or a portion of a fund's underlying securities trade in a market that is closed when the market in which the fund's shares are listed and trading in that market is open, there may be changes between the last quote from the closed foreign market and the value of such security during the fund's domestic trading day. In turn, this could lead to differences between the market price of the fund's shares and the underlying value of its shares.

Investment-Grade Debt Securities Risk

Investment-grade debt securities may be downgraded by a nationally recognized statistical rating organization ("NRSRO") to below-investment-grade status, which would increase the risk of holding these securities. Investment-grade debt securities rated in the lowest rating category by a NRSRO involve a higher degree of risk than fixed-income securities with higher credit ratings.

U.S. Government Securities Risk

U.S. government securities, which may be backed by the U.S. Department of the Treasury or the full faith and credit of the U.S., and may include U.S. Treasury bills, Treasury Inflation-Protected Securities, notes and bonds, are guaranteed only as to the timely payment of interest and principal when held to maturity. The market prices for such securities are not guaranteed and will fluctuate. Certain U.S. government agency securities are backed by the right of the issuer to borrow from the U.S. Department of the Treasury, or are supported only by the credit of the issuing agency or instrumentality, and in some cases there may be some risk of default by the issuer. Default by the issuer means the maximum potential liability of the issuers of some U.S. government securities may greatly exceed their current resources, including their legal right to support from the U.S. Treasury. It is possible that these issuers will not have the funds to meet their payment obligations in the future.

Asset-Backed Securities Risk

Asset-backed securities are fixed-income securities backed by other assets such as credit card, automobile or consumer loan receivables, retail installment loans, or participations in pools of leases. The values of these securities are sensitive to changes in the credit quality of the underlying collateral, the credit strength of any credit enhancement feature, changes in interest rates, and, at times, the financial condition of the issuer.

Mortgage-Backed Securities Risk

Mortgage-backed securities are fixed-income securities representing an interest in a pool of underlying mortgage loans. Mortgage-backed securities are sensitive to changes in interest rates, but may respond to these changes differently from other fixed-income securities due to the possibility of prepayment of the underlying mortgage loans. Mortgage-backed securities may fluctuate in price based on deterioration in the value of the collateral underlying the pool of mortgage loans, which may result in the collateral being worth less than the remaining principal amount owed on the mortgages in the pool.

Corporate Loan Risk

The corporate loans, commonly referred to as bank loans, in which the Fund invests may be rated below investment grade. As a result, such corporate loans will be considered speculative with respect to the borrowers' ability to make payments of interest and principal and will otherwise generally bear risks similar to those associated with non-investment grade securities. There is a high risk that the Fund could suffer a loss from investments in lower rated corporate loans as a result of a default by the borrower. Direct investments in loans may be illiquid and holding a loan could expose the Fund to the risks of being a direct lender.

Prepayment and Extension Risk

When interest rates fall, issuers of high interest debt obligations may pay off the debts earlier than expected (prepayment risk), and the Fund may have to reinvest the proceeds at lower yields. When interest rates rise, issuers of lower interest debt obligations may pay off the debts later than expected (extension risk), thus keeping the Fund's assets tied up in lower interest debt obligations.

Preferred Stock Risk

Preferred stocks may pay fixed or adjustable rates of return and are subject to many of the risks associated with debt securities (e.g., interest rate risk, call risk and extension risk). In addition, preferred securities are subject to issuer-specific and market risks applicable generally to equity securities. Because many preferred securities allow the issuer to convert their preferred security into common stock, preferred securities are often sensitive to declining common stock values. A company's preferred securities generally pay dividends only after the company makes required payments to holders of its bonds and other debt. For this reason, the value of preferred securities will usually react more strongly than bonds and other debt to actual or perceived changes in the company's financial condition or prospects. Preferred securities of smaller companies may be more vulnerable to adverse developments than preferred stock of larger companies.

Call Risk

Call risk is the possibility that an issuer may redeem a U.S. Treasury or government security before maturity at a price below or above its current market price. An increase in the likelihood of a call may reduce the security's price. If a U.S. Treasury or government security is called, the Fund may have to reinvest the proceeds in other fixed-income securities with lower interest rates, higher credit risks or other less favorable characteristics. In

addition, during a period of falling interest rates, the issuer may redeem a security by repaying it early, which may reduce the Fund's income if the proceeds are reinvested at lower interest rates.

Other Investment Companies Risk

The Fund's investments in other investment companies, including ETFs and closed-end funds, will be subject to substantially the same risks as those associated with the direct ownership of the securities comprising the portfolios of such investment companies, and the value of the Fund's investment will fluctuate in response to the performance of such portfolios. In addition, if the Fund acquires shares of other investment companies, shareholders of the Fund will bear both their proportionate share of the fees and expenses of the Fund (including management and advisory fees) and, indirectly, the fees expenses of the other investment companies.

Closed-End Fund Risk

Shares of closed-end funds frequently trade at a price per share that is less than the NAV per share. There can be no assurance that the market discount on shares of any closed-end fund purchased by the Fund will ever decrease or that when the Fund seeks to sell shares of a closed-end fund it can receive the NAV of those shares. Closed-end funds have lower levels of daily volume when compared to open-end companies. There are greater risks involved in investing in securities with limited market liquidity. Closed-end funds may also issue senior securities (including preferred stock and debt obligations) for the purpose of leveraging the closed-end fund's common shares in an attempt to enhance the current return to such closed-end fund's common shareholders. The Fund's investment in the common shares of closed-end funds that are financially leveraged may create an opportunity for greater total return on its investment, but at the same time may be expected to exhibit more volatility in market price and NAV than an investment in shares of investment companies without a leveraged capital structure.

High Yield Securities Risk

Securities that are rated below investment grade (*i.e.*, "junk bonds") are subject to additional risk factors due to the speculative nature of the securities, such as increased possibility of default, liquidation of the security, and changes in value based on public perception of the issuer. High yield securities are considered predominantly speculative with respect to an issuer's continuing ability to make principal and interest payments, and may be more volatile than other types of securities. In addition, the market for high yield securities is generally less active than the market for higher quality securities. As a result, an economic downturn or individual corporate developments could adversely affect the market for these securities and reduce the Fund's ability to sell these securities at an advantageous time or price. An economic downturn would also generally lead to a higher non-payment rate and, a high yield security may lose significant market value before a default occurs.

Distressed or Defaulted Securities Risk

Investments in defaulted securities and obligations of distressed issuers, including securities that are, or may be, involved in reorganizations or other financial restructurings, either out of court or in bankruptcy, involve substantial risks in addition to the risks of investing in high-yield debt securities. These securities are considered speculative with respect to the issuers' continuing ability to make principal and interest payments. The Fund may incur costs to protect its investment, and the Fund could lose its entire investment. Distressed securities and any securities received in an exchange for such securities may be subject to restrictions on resale.

Management Risk

Management risk describes the Fund's ability to meet its investment objective based on the Advisor's success or failure to implement investment strategies for the Fund. The value of your investment in the Fund is subject to the investment strategies used by the Advisor in selecting investments, including the ability of the Advisor to assess economic conditions and investment opportunities, and may not result in an increase in the value of your investment or in overall performance equal to other investments. Management risk includes the risk that poor security selection may cause the Fund to underperform relative to other funds with similar investment objectives, or that the timing of movements from one type of security to another could have a negative effect on the overall investment performance of the Fund. If the Advisor's investment strategies do not produce the expected results, your investment could be diminished or even lost.

Municipal Securities Risk

The Fund may have a portion of its assets invested in various municipal securities that depend on the ability of the municipalities to continue to meet their obligations for the payment of interest and principal when due. Municipal issuers may be adversely affected by rising health care costs, increasing unfunded pension liabilities, and by the phasing out of federal programs providing financial support. Unfavorable conditions and developments relating to projects financed with municipal securities can result in lower revenues to issuers of municipal securities. Issuers often depend on revenues from these projects to make principal and interest payments. Any adverse economic conditions or developments affecting the states or municipalities that issue the municipal securities in which the Fund invests could negatively impact the Fund.

Non-diversification risk.

The Fund is classified as “non-diversified,” which means it may invest a larger percentage of its assets in a smaller number of issuers than a diversified fund. To the extent the Fund invests its assets in a smaller number of issuers, the Fund will be more susceptible to negative events affecting those issuers than a diversified fund. However, the Fund intends to satisfy the asset diversification requirements under Subchapter M of the Internal Revenue Code of 1986, as amended (the “Code”) for classification as a regulated investment company (“RIC”).

Derivatives Risk

Using derivatives can increase the Fund’s losses and reduce opportunities for gains when market prices, interest rates, currencies, or the derivatives themselves, behave in a way not anticipated by the Fund. Using derivatives also can have a leveraging effect and increase Fund volatility. Certain derivatives have the potential for unlimited loss, regardless of the size of the initial investment. Derivatives may be difficult to sell, unwind or value, and the counterparty may default on its obligations to the Fund. Derivatives are generally subject to the risks applicable to the assets, rates, indices or other indicators underlying the derivative. The value of a derivative may fluctuate more than the underlying assets, rates, indices or other indicators to which it relates. Use of derivatives may have different tax consequences for the Fund than an investment in the underlying security, and those differences may affect the amount, timing and character of income distributed to shareholders.

Rule 18f-4 under the 1940 Act provides a comprehensive regulatory framework for the use of derivatives by funds and imposes requirements and restrictions on funds using derivatives. The rule may not effectively limit the risk of loss from derivatives.

Futures Contract Risk. The primary risks associated with the use of futures contracts are (a) the imperfect correlation between the change in market value of the instruments held by the Fund and the price of the forward or futures contract; (b) possible lack of a liquid secondary market and the resulting inability to close futures contract when desired; (c) losses caused by unanticipated market movements, which are potentially unlimited; (d) the Advisor’s inability to predict correctly the direction of securities prices, interest rates, currency exchange rates and other economic factors; and (e) if the Fund has insufficient cash, it may have to sell securities from its portfolio to meet daily variation margin requirements, and the Fund may have to sell securities at a time when it may be disadvantageous to do so.

Leverage Risk. Derivative instruments provide the economic effect of financial leverage by creating additional investment exposure, as well as the potential for greater loss. If the Fund uses leverage through derivative instruments, the Fund has the risk of losing more than its original investment. The net asset value (“NAV”) of the Fund when employing leverage will be more volatile and sensitive to market movements.

Market Risk

Market risks, including political, regulatory, market, and economic or other developments, and developments that impact specific economic sectors, industries or segments of the market, can affect the value of the Fund’s shares. Local, regional, or global events such as war, acts of terrorism, the spread of infectious illness or other public health issues, recessions, or other events could have a significant impact on the market generally and on specific securities. The Fund is subject to the risk that the prices of, and the income generated by, securities held by the Fund may decline significantly and/or rapidly in response to adverse issuer, political, regulatory, general economic and market conditions, or other developments, such as regional or global economic instability

(including terrorism and related geopolitical risks), interest rate fluctuations, and those events directly involving the issuers that may cause broad changes in market value, public perceptions concerning these developments, and adverse investor sentiment. Such events may cause the value of securities owned by the Fund to go up or down, sometimes rapidly or unpredictably. Changes in the economic climate, investor perceptions and stock market volatility also can cause the prices of the Fund's investments to decline regardless of the conditions of the issuers held by the Fund. There is also a risk that policy changes by the U.S. government and/or Federal Reserve, such as increasing interest rates, could cause increased volatility in financial markets and higher levels of Fund redemptions, which could have a negative impact on the Fund. These events may lead to periods of volatility and increased redemptions, which could cause a fund to experience a loss when selling securities to meet redemption requests by shareholders. The risk of loss increases if the redemption requests are unusually large or frequent.

Prices may fluctuate widely over short or extended periods in response to company, market or economic news. Markets also tend to move in cycles, with periods of rising and falling prices. If there is a general decline in the securities and other markets, your investment in the Fund may lose value, regardless of the individual results of the securities and other instruments in which the Fund invests.

Policy and legislative changes in the United States and in other countries will impact many aspects of financial regulation, and may in some instances contribute to decreased liquidity and increased volatility in the financial markets. The impact of such changes on the markets, and the practical implications for market participants, may not be fully known at the time of adoption.

Economies and financial markets throughout the world are becoming increasingly interconnected. As a result, whether or not the Fund invests in securities of issuers located in or with significant exposure to countries experiencing economic and financial difficulties, the value and liquidity of the Fund's investments may be negatively affected.

Periods of market volatility may occur in response to market events and other economic, political, and global macro factors. These events (e.g. global pandemic, military conflicts, inflation and/or recessions) can cause significant disruptions to business operations, including business closures; strained healthcare systems; disruptions to supply chains and employee availability; large fluctuations in consumer demand; large expansion of government deficits and debt as a result of government actions to mitigate the effects of such events; and widespread uncertainty regarding the long-term effects of such events. Such events could be prolonged and could adversely affect the value and liquidity of the Fund's investments and negatively impact the Fund's performance.

Foreign Securities and Companies Risk

Foreign securities, including those issued by foreign governments, involve risks in addition to those associated with comparable U.S. securities. Additional risks include exposure to less developed or less efficient trading markets; social, political or economic instability; fluctuations in foreign currencies or currency redenomination; potential for default on sovereign debt; nationalization or expropriation of assets; settlement, custodial or other operational risks; and less stringent auditing and legal standards. In addition, key information about the issuer, the markets or the local government or economy may be unavailable, incomplete or inaccurate. As a result, foreign securities can fluctuate more widely in price, and may also be less liquid, than comparable U.S. securities. Although foreign securities offer added diversification potential, world markets, or those in a particular region, may all react in similar fashion to important economic or political developments. Securities issued by U.S. entities with substantial foreign operations can involve additional risks relating to conditions in foreign countries.

- **Political and Economic Factors.** Individual economies of certain countries may differ favorably or unfavorably from the United States' economy in such respects as growth of gross national product, rate of inflation, capital reinvestment, resource self-sufficiency, diversification and balance of payments position. The internal politics of certain foreign countries may not be as stable as those of the U.S. Government in certain foreign countries also continue to participate to a significant degree, through ownership interest or regulation, in their respective economies. Action by these governments could include restrictions on foreign investment, nationalization and expropriation of goods or imposition of taxes, which could have a significant effect on market prices of securities and payment of interest. The economies of many foreign countries are heavily dependent upon international trade and are accordingly affected by the trade policies

and economic conditions of their trading partners. Enactment by these trading partners of protectionist trade legislation could have a significant adverse effect upon the securities markets of such countries.

- **Legal and Regulatory Matters.** Certain foreign countries may have less supervision of securities markets, brokers and issuers of securities, and less financial information available to issuers, than is available in the United States.
- **Currency Fluctuations.** A change in the value of any foreign currency against the U.S. dollar will result in a corresponding change in the U.S. dollar value of an ADR's underlying portfolio securities denominated in that currency. Such changes will affect the Fund to the extent that the Fund is invested in ADRs comprised of foreign securities.
- **Foreign Taxes.** The interest and dividends payable to the Fund on certain of its foreign securities may be subject to foreign taxes or withholding, thus reducing the net amount of income available for distribution to Fund shareholders. The Fund may not be eligible to pass through any tax credit or deductions to shareholders with respect to such foreign taxes or withholding.

In considering whether to invest in the securities of a non-U.S. company, the Advisor considers such factors as the characteristics of the particular company, differences between economic trends and the performance of securities markets within the U.S. and those within other countries, and factors relating to the general economic, governmental and social conditions of the country or countries where the company is located. The extent to which the Fund will be invested in non-U.S. companies, foreign countries and depositary receipts will fluctuate from time to time within any limitations described in the Prospectus, depending on the Advisor's assessment of prevailing market, economic and other conditions.

In addition, foreign markets can perform differently than the U.S. market. Over a given period of time, foreign securities may underperform U.S. securities, sometimes for years. The Fund could also underperform if the Fund's portfolio managers invest in countries or regions whose economic performance falls short. To the extent that the Fund invests a portion of its assets in one country, state, region or currency, an adverse economic, business or political development may affect the value of the Fund's investments more than if its investments were not so invested. The effect of recent worldwide economic instability on specific foreign markets or issuers may be difficult to predict or evaluate. Some national economies continue to show profound instability, which may in turn affect their international trading and financial partners or other members of their currency bloc.

Investing in foreign securities may also involve a greater risk for excessive trading due to "time-zone arbitrage." If an event occurring after the close of a foreign market, but before the time the Fund computes its current net asset value ("NAV"), causes a change in the price of the foreign securities and such price is not reflected in the Fund's current NAV, investors may attempt to take advantage of anticipated price movements in securities held by the Fund based on such pricing discrepancies.

Among the foreign markets in which the Fund may invest are those countries that are members of the European Union ("EU"). Some of the countries of the EU are currently experiencing financial difficulties and have depended on, and may continue to be dependent on, the assistance from others such as the European Central Bank or other governments or institutions. The failure of such countries to implement reforms as a condition of assistance could have a significant adverse effect on the value of investments in those countries and other countries within this "Eurozone." In addition, certain EU countries that have adopted the euro are subject to fiscal and monetary controls that could limit the ability to implement their own economic policies, to the point where such countries could voluntarily abandon, or be forced out of, the euro. These events could globally impact the market values of securities and currencies, cause redenomination into less valuable local currencies and create more volatile and illiquid markets. The United Kingdom's departure from the EU, commonly known as "Brexit," may have significant political and financial consequences for EU markets. There are considerable uncertainties about the repercussions resulting from Brexit, including the impact on trade agreements, regulations, and treaties. Brexit may also increase the likelihood that other EU members may decide to leave or be expelled from the EU. These potential consequences may result in increased market volatility and illiquidity in the United Kingdom, the EU, and other financial markets, as well as slower economic growth and fluctuations in exchange rates. Any of

these events and other socio-political or geo-political issues that are not currently known could have a significant adverse effect on global markets and economies, which in turn could negatively impact the value of the Fund's investments.

Portfolio Turnover Risk

As a result of its active trading strategy, the Fund may incur higher levels of brokerage fees and commissions, which could reduce performance. High portfolio turnover also may generate net short-term capital gains distributions, which could also cause higher levels of current tax liability to shareholders in the Fund.

Cybersecurity Risk.

Cybersecurity incidents may allow an unauthorized party to gain access to Fund assets, customer data (including private shareholder information), or proprietary information, or cause the Fund, its advisor, and/or its other service providers (including, but not limited to, fund accountants, custodians, sub-custodians, transfer agents and financial intermediaries) to suffer data breaches, data corruption or lose operational functionality.

Cybersecurity risks are also present for issuers of securities or other assets in which the Fund invests, which could result in material adverse consequences for such issuers and may cause the Fund's investments to lose value. Cyber incidents can result from deliberate attacks or unintentional events. They include, but are not limited to, gaining unauthorized access to systems, misappropriating assets or sensitive information, corrupting or destroying data, and causing operational disruption. Geopolitical tensions may increase the scale and sophistication of deliberate attacks, particularly those from nation-states or from entities with nation-state backing.

Cybersecurity incidents may cause disruptions and impact business operations and may result in any of the following: financial losses, interference with the Fund's ability to calculate its NAV, disclosure of confidential information, impediments to trading, submission of erroneous trades or erroneous creation or redemption orders, the inability of the Fund or its service providers to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, and other legal and compliance expenses. In addition, cyber incidents may render records of Fund assets and transactions, shareholder ownership of Fund shares, and other data integral to the Fund's functioning inaccessible, inaccurate or incomplete.

DISCLOSURE OF PORTFOLIO HOLDINGS

A complete description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the Fund's Statement of Additional Information ("SAI").

MANAGEMENT OF THE FUND

Investment Advisor

The Fund's investment advisor, Bramshill Investments, LLC, is located at 801 Laurel Oak Drive, Suite 300A, Naples, Florida 34108. The Advisor is an SEC-registered investment advisory firm formed in 2012. As of December 31, 2024, the Advisor had assets under management of approximately \$7 billion.

The Advisor is responsible for the day-to-day management of the Fund in accordance with the Fund's investment objective and policies. The Advisor also furnishes the Fund with office space and certain administrative services and provides most of the personnel needed to fulfill its obligations under its advisory agreement. The Fund does not pay the Advisor a management fee. Instead, investors in the Fund will be charged management fees by the Advisor and persons other than the Advisor as described below. Only the following purchasers are eligible to invest in, or own the Fund: (a) investment advisory clients of the Advisor, (b) participants in "wrap-fee" programs sponsored by investment advisors unaffiliated with the Fund or the Advisor ("Sponsors") that are advised by the Advisor, (c) clients of affiliated companies of the Advisor, and (d) employees of the Advisor.

The Advisor receives an account-level investment management fee from its investment advisory clients (as stated in clients' investment management agreements) calculated as a percentage of client assets, which includes assets invested in the Fund. Retail and institutional separately managed account/wrap clients will pay a fee to the sponsor. The Advisor will receive a fee from the sponsor or separately managed account/wrap clients in connection with the Advisor's management of client accounts and participation in investment programs through

which shares of the Fund are made available. Investors should read carefully the “wrap-fee” brochure for these programs provided by the sponsor. The brochure is required to include information about the fees charged by the sponsor and the fees paid by the sponsor to the Advisor. Investors pay no additional fees or expenses to purchase shares of the Fund.

The Advisor has contractually agreed to not charge a management fee and to reimburse all expenses of the Fund, except certain expenses, indefinitely. Excluded expenses include (i) interest, taxes, dividends tied to short sales; (ii) the Fund’s pro rata share of the fees and expenses incurred indirectly by the Fund as a result of investing in other investment companies (i.e., acquired fund fees and expenses); (iii) other expenses attributable to, and incurred as a result of, the Fund’s investments; (iv) extraordinary expenses (including litigation expenses) not incurred in the ordinary course of the Fund’s business, if any; and (v) other expenses listed in the expense limitation agreement, which may only be terminated by the Advisor with the consent of the Board. If certain conditions are met, the Advisor may recoup reimbursed expenses in accordance with the agreement.

A discussion regarding the basis of the Board’s approval of the advisory agreement for the Fund will be available in the Fund’s first report filed on Form N-CSR.

Portfolio Managers

Art DeGaetano and Derek Pines serve as the Senior Portfolio Managers jointly and primarily responsible for the day-to-day management of the Fund since April 2025.

Art DeGaetano is a Principal of Bramshill Investments. Before starting Bramshill in May of 2012, Mr. DeGaetano was a Senior Portfolio Manager at GLG Partners from 2007. Prior to GLG Partners, he traded at RBS Greenwich Capital where he was a Managing Director and Head of Credit Trading for two years. Prior to RBS, he traded for 12 years for Bear Stearns and was a Senior Managing Director and Head Trader on the high yield desk. Mr. DeGaetano has a B.A. from Colgate University. Mr. DeGaetano has been a portfolio manager for the Fund since its inception in April 2025.

Derek Pines is a Portfolio Manager and Analyst at Bramshill Investments. Prior to joining Bramshill Investments in 2012, Mr. Pines spent 10 years as a Proprietary Trader and Portfolio Manager specializing in quantitative strategies across a variety of asset classes, the bulk of that time with Assent (Sungard Financial) and most recently Chimera Securities. He also spent a year with Accenture in their Core Trading Services Group. Mr. Pines holds a Masters Graduate Certificate in Algorithmic Trading from Stevens University. Mr. Pines graduated cum laude with a B.S. in finance from Georgetown University. Mr. Pine has been a portfolio manager for the Fund since April 2025.

The SAI provides additional information about the portfolio managers’ compensation, other accounts managed by the portfolio managers, and the portfolio managers’ ownership of securities in the Fund.

SHAREHOLDER INFORMATION

Pricing of Fund Shares

Shares of the Fund are sold at NAV per share, which is calculated as of the close of regular trading (generally 4:00 p.m., Eastern Time) on each day that the New York Stock Exchange (“NYSE”) is open for unrestricted business. However, the Fund’s NAV may be calculated earlier if trading on the NYSE is restricted or as permitted by the Securities and Exchange Commission (the “SEC”). The NYSE is closed on weekends and most national holidays, including New Year’s Day, Martin Luther King, Jr. Day, Washington’s Birthday/Presidents’ Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. The NAV will not be calculated on days when the NYSE is closed for trading.

Purchase and redemption requests are priced based on the next NAV per share calculated after receipt of such requests. The NAV is the value of the Fund’s securities, cash and other assets, minus all expenses and liabilities (assets – liabilities = NAV). NAV per share is determined by dividing NAV by the number of shares outstanding (NAV/# of shares = NAV per share). The NAV takes into account the expenses and fees of the Fund, including administration fees, which are accrued daily.

In calculating the NAV, portfolio securities are valued using current market values or official closing prices, if available. Each security owned by the Fund that is listed on a securities exchange is valued at its last sale price on that exchange on the date as of which assets are valued. Where the security is listed on more than one exchange, the Fund will use the price of the exchange that the Fund generally considers to be the principal exchange on which the security is traded. Corporate bonds, including listed issues, are valued at market on the basis of valuations furnished by an independent pricing service which utilizes both dealer supplied valuations and formula-based techniques. The pricing service may consider recently executed transactions in securities of the issuer or comparable issuers, market price quotations (where observable), bond spreads, and fundamental data relating to the issuer. U.S. government securities are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued principally using dealer quotations. U.S. government agency securities are comprised of two main categories consisting of agency issued debt and mortgage pass-throughs. Agency issued debt securities are generally valued in a manner similar to U.S. government securities. Mortgage pass-throughs include to-be-announced (“TBAs”) securities and mortgage pass-through certificates. TBA securities and mortgage pass-throughs are generally valued using dealer quotations. Investments in open-end mutual funds and ETFs are valued at their closing net asset value per share. Short-term debt securities, including those securities having a maturity of 60 days or less, are valued at the evaluated mean between the bid and asked prices.

When reliable market quotations are not readily available or the Fund’s pricing service does not provide a valuation (or provides a valuation that in the judgment of the Advisor to the Fund does not represent the security’s fair value) or when, in the judgment of the Advisor, events have rendered the market value unreliable, a security or other asset will be valued at its fair value in good faith in accordance with the Advisor’s pricing procedures, subject to oversight by the Board. Valuing securities at fair value is intended to ensure that the Fund is accurately priced and involves reliance on judgment. The Advisor will regularly evaluate whether the Fund’s fair valuation pricing procedures continue to be appropriate in light of the specific circumstances of the Fund and the quality of prices obtained through the application of such procedures. There can be no assurance that the Fund will obtain the fair value assigned to a security if it were to sell the security at approximately the time at which the Fund determines its NAV per share.

Types of securities that the Fund may hold for which fair value pricing might be required include, but are not limited to: (a) investments which are not frequently traded and/or the market price of which the Advisor believes may be stale; (b) illiquid securities, including “restricted” securities and private placements for which there is no public market; (c) securities of an issuer that has entered into a restructuring; (d) securities whose trading has been halted or suspended; and (e) fixed income securities that have gone into default and for which there is not a current market value quotation.

Trading in Foreign Securities

Fair value pricing may be applied to non-U.S. investments. The trading hours for most non-U.S. investments end prior to the close of the NYSE, the time that the Fund’s NAV is calculated. The occurrence of certain events after the close of non-U.S. markets, but prior to the close of the NYSE (such as a significant surge or decline in the U.S. market) often will result in an adjustment to the trading prices of non-U.S. investments when non-U.S. markets open on the following business day. If such events occur, the Fund may value non-U.S. investments at fair value, taking into account such events, when it calculates its NAV. In such cases, use of fair valuation can reduce an investor’s ability to seek profit by estimating the Fund’s NAV per share in advance of the time the NAV per share is calculated.

How to Buy Shares

Only the following purchasers are eligible to invest in, or own the Fund: (a) investment advisory clients of the Advisor, (b) participants in “wrap-fee” programs sponsored by investment advisors unaffiliated with the Fund or the Advisor (“Sponsors”) that are advised by the Advisor, (c) clients of affiliated companies of the Advisor, and (d) employees of the Advisor. Shares of the Fund are offered to Eligible Investors either directly by the Advisor or through special arrangements entered into on behalf of the Fund with certain broker-dealers, financial institutions or other service providers (“Servicing Agents”). These Servicing Agents will become shareholders of record of the Fund and have established procedures that investors must follow in purchasing shares. Such

procedures need not be identical among Servicing Agents. These procedures should be carefully reviewed by investors.

The Fund has no minimum initial investment amount or subsequent investment amount.

Servicing Agents may charge fees to their customers for the services they provide them. Also, the Fund and/or the Advisor may pay fees to Servicing Agents to compensate them for the services the Servicing Agents provide to their customers. Further, the Fund may authorize Servicing Agents to receive purchase orders on behalf of the Fund and to designate other Servicing Agents to receive purchase orders on the Fund's behalf. This means that the Fund will process the purchase order at the NAV per share that is determined following the Servicing Agent's (or its designee's) acceptance of the purchase order. The Fund will be deemed to have received a purchase or redemption order when a Servicing Agent or, if applicable, a Servicing Agent's authorized designee, receives the order.

When you are purchasing shares through a Servicing Agent, it is the responsibility of the Servicing Agent to place your order with the Fund on a timely basis. If the Servicing Agent does not, or if it does not pay the purchase price to the Fund within the period specified in its agreement with the Fund, it may be held liable for any resulting fees or losses.

You may purchase shares of the Fund by check, by wire transfer, via electronic funds transfer through the Automated Clearing House ("ACH") network through an authorized bank or through one or more brokers authorized by the Fund to receive purchase orders. If you have any questions or need further information about how to purchase shares of the Fund, you may call a customer service representative of the Fund toll-free at 877-BRAMS18 or 877-272-6718. The Fund reserves the right to reject any purchase order. For example, a purchase order may be refused if, in the Advisor's opinion, it is so large that it would disrupt the management of the Fund. Orders may also be rejected from persons believed by the Fund to be "market timers." If the Fund were to reject a purchase order, notification would likely occur no later than the next business day after receipt of order.

All checks must be in U.S. dollars drawn on a domestic U.S. bank. The Fund will not accept payment in cash or money orders. The Fund does not accept postdated checks or any conditional order or payment. To prevent check fraud, the Fund will not accept third party checks, Treasury checks, credit card checks, traveler's checks or starter checks for the purchase of shares.

In addition to cash purchases, Fund shares may be purchased by tendering payment in-kind in the form of shares of stock, bonds or other securities. Any securities used to buy Fund shares must be readily marketable, their acquisition consistent with the Fund's objective and otherwise acceptable to the Advisor and the Board. For further information, you may call a customer service representative of the Fund toll-free at 877-BRAMS18 or 877-272-6718.

In compliance with the USA PATRIOT Act of 2001, please note that the Transfer Agent will verify certain information on your account application as part of the Trust's Anti-Money Laundering Program. As requested on the account application, you must supply your full name, date of birth, social security number and permanent street address. If you are opening the account in the name of a legal entity (e.g., partnership, limited liability company, business trust, corporation, etc.), you should also supply the identity of the beneficial owners. Mailing addresses containing only a P. O. Box will not be accepted. Please contact the Transfer Agent at 877-BRAMS18 or 877-272-6718 if you need additional assistance when completing your account application.

If the Transfer Agent does not have a reasonable belief of the identity of an investor, the account application will be rejected or the investor will not be allowed to perform a transaction on the account until such information is received. In the rare event that the Transfer Agent is unable to verify your identity, the Fund reserves the right to redeem your account at the current day's net asset value.

Shares of the Fund have not been registered for sale outside of the United States. The Advisor generally does not sell shares to investors residing outside of the United States, even if they are United States citizens or lawful permanent residents, except to investors with United States military APO or FPO addresses. The Fund reserves the right to refuse purchases from shareholders who must file a Form W-8.

How to Redeem (Sell) Shares

You or your Servicing Agent have the right to redeem all or any portion of your shares of the Fund at their NAV per share on each day the NYSE is open for trading. All redemption requests must be made directly or through the Servicing Agent from whom you purchased your shares. The Servicing Agents have established procedures that investors must follow in selling (redeeming) shares. Such procedures need not be identical among Servicing Agents. These procedures should be carefully reviewed by investors. As discussed below, you may receive proceeds of your sale in a check, ACH, or federal wire transfer. The Fund typically expects that it will take one to three days following the receipt of your redemption request in good order, to pay out redemption proceeds. “Good order” means your redemption request includes: (1) the name of the Fund, (2) the number of shares or dollar amount to be redeemed, (3) the account number and (4) signatures by all of the shareholders whose names appear on the account registration. However, while not expected, payment of redemption proceeds may take up to even days if sending proceeds earlier could adversely affect the Fund.

The Fund typically expects that it will hold cash or cash equivalents to meet redemption requests. The Fund may also use the proceeds from the sale of portfolio securities to meet redemption requests if consistent with the management of the Fund. These redemption methods will be used regularly and may also be used in unusual market conditions.

Payment of Redemption Proceeds

The Fund typically sends the redemption proceeds on the next business day (a day when the NYSE is open for normal business) after the redemption request is received in good order and prior to market close, regardless of whether the redemption proceeds are sent via check, wire, or ACH transfer. While not expected, payment of redemption proceeds may take up to seven days. If you did not purchase your shares with a wire payment, before selling recently purchased shares, please note that if the Transfer Agent has not yet collected payment for the shares you are selling, it may delay sending the proceeds until the payment is collected, which may take up to 15 calendar days from the purchase date.

Redemption “In-Kind”

The Fund typically expects to meet redemption requests by paying out proceeds from cash or cash equivalent portfolio holdings, or by selling portfolio holdings. In stressed market conditions, redemption methods may include paying redemption proceeds to you in whole or in part by a distribution of securities from the Fund’s portfolio (a “redemption in-kind”). It is not expected that the Fund would do so except during unusual market conditions. The redemption in-kind would be a pro-rata distribution of portfolio assets. If the Fund pays your redemption proceeds by a distribution of securities, you could incur brokerage or other charges in converting the securities to cash and will bear any market risks associated with such securities until they are converted into cash. A redemption in-kind is treated as a taxable transaction and a sale of the redeemed shares, generally resulting in capital gain or loss to you, subject to certain loss limitation rules. If the Fund held illiquid securities, such distribution may contain a pro rata portion of such illiquid securities or the Fund may determine, based on a materiality assessment, not to include illiquid securities in the in-kind redemption. If such securities are included in the distribution, shareholders may not be able to liquidate such securities and may be required to hold such securities indefinitely.

Signature Guarantees

Signature guarantees will generally be accepted from domestic banks, brokers, dealers, credit unions, national securities exchanges, registered securities associations, clearing agencies and savings associations, as well as from participants in the New York Stock Exchange Medallion Signature Program and the Securities Transfer Agents Medallion Program. *A notary public is not an acceptable signature guarantor.*

A signature guarantee from either a Medallion program member or a non-Medallion program member is required in the following situations:

- If ownership is changed on your account;
- When redemption proceeds are payable or sent to any person, address or bank account not on record;
- When a redemption request is received by the Transfer Agent and the account address has changed within the last 15 calendar days;
- For all redemptions in excess of \$50,000 from any shareholder account, including IRAs.

The Fund or the Advisor or the Sub-Advisor may waive any of the above requirements in certain instances. In addition to the situations described above, the Fund, the Advisor, the Sub-Advisor and/or the Transfer Agent reserve the right to require a signature guarantee in other instances based on the circumstances relative to the particular situation.

Non-financial transactions, including establishing or modifying certain services on an account, may require a signature guarantee, signature verification from a Signature Validation Program member, or other acceptable form of authentication from a financial institution source.

DIVIDENDS AND DISTRIBUTIONS

The Fund intends to distribute to its shareholders substantially all of its net investment income and capital gains. Dividends, if any, of net investment income are declared and paid monthly by the Fund. The Fund makes distributions of capital gains, if any, at least annually. If you own shares on the Fund's distribution record date, you will be entitled to receive the distribution.

You will receive income dividends and distributions of capital gains in cash. The Fund does not currently offer investors the opportunity to reinvest dividends in additional Fund shares.

The Fund's dividends and other distributions are taxable to shareholders (other than retirement plans and other tax-exempt investors) whether received in cash or reinvested in additional shares of the Fund. A dividend or distribution paid by the Fund has the effect of reducing the NAV per share on the ex-dividend date by the amount of the dividend or distribution. A dividend or distribution declared shortly after a purchase of shares by an investor would, therefore, represent, in substance, a return of capital to the shareholder with respect to such shares even though it would be subject to federal income taxes.

For most shareholders, a statement will be sent to you within 45 days after the end of each year detailing the federal income tax status of your distributions. Please see "Tax Consequences" below for more information on the federal income tax consequences of dividends and other distributions made by the Fund.

TOOLS TO COMBAT FREQUENT TRANSACTIONS

The Board has adopted policies and procedures to prevent frequent transactions in the Fund. The Fund discourages excessive, short-term trading and other abusive trading practices that may disrupt portfolio management strategies and harm the Fund's performance. The Fund takes steps to reduce the frequency and effect of these activities in the Fund. These steps include monitoring trading practices and using fair value pricing. Although these efforts are designed to discourage abusive trading practices, these tools cannot eliminate the possibility that such activity may occur. Further, while the Fund makes efforts to identify and restrict frequent trading, the Fund receives purchase and sale orders through financial intermediaries and cannot always know or detect frequent trading that may be facilitated by the use of intermediaries or the use of group or omnibus accounts by those intermediaries. The Fund seeks to exercise its judgment in implementing these tools to the best of its abilities in a manner that the Fund believes is consistent with shareholder interests.

The Fund monitors selected trades in an effort to detect excessive short-term trading activities. If, as a result of this monitoring, the Fund believes that a shareholder has engaged in excessive short-term trading, it may, in its discretion, ask the shareholder to stop such activities or refuse to process purchases in the shareholder's accounts. In making such judgments, the Fund seeks to act in a manner that it believes is consistent with the best interests of shareholders. Due to the complexity and subjectivity involved in identifying abusive trading activity and the volume of shareholder transactions the Fund handles, there can be no assurance that the Fund's efforts will

identify all trades or trading practices that may be considered abusive. In addition, the Fund's ability to monitor trades that are placed by individual shareholders within group or omnibus accounts maintained by financial intermediaries is limited because the Fund does not have simultaneous access to the underlying shareholder account information.

In compliance with Rule 22c-2 under the 1940 Act, the Distributor, on behalf of the Fund, has entered into written agreements with each of the Fund's financial intermediaries, under which the intermediary must, upon request, provide the Fund with certain shareholder and identity trading information so that the Fund can enforce its market timing policies.

The Fund employs fair value pricing selectively, as discussed above, to ensure greater accuracy in its daily NAV and to prevent dilution by frequent traders or market timers who seek to take advantage of temporary market anomalies.

TAX CONSEQUENCES

Below are certain important U.S. federal income tax issues that affect the Fund and its shareholders. The following summary is very general, applies only to shareholders who are U.S. persons, and does not address shareholders subject to special rules, such as those who hold Fund shares through an IRA, 401(k) plan or other tax-advantaged account. Except as specifically noted, the discussion is limited to federal income tax matters and does not address state, local, foreign or non-income taxes. Further information regarding taxes, including certain federal income tax considerations relevant to non-U.S. persons, is included in the SAI. Because each shareholder's circumstances are different and special tax rules may apply, you should consult your tax advisor about federal, state, local and/or foreign tax considerations that may be relevant to your particular situation. The summary is based on current tax law, which may be changed by legislative, judicial or administrative action.

The Fund has elected and intends to qualify each year for treatment as a regulated investment company (a "RIC") within the meaning of Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"). If it meets certain minimum distribution requirements, a RIC is not subject to tax at the fund level on income and gains from investments that are timely distributed to shareholders. However, the Fund's failure to qualify as a RIC or to meet minimum distribution requirements would result (if certain relief provisions were not available) in fund-level taxation and, consequently, a reduction in income available for distribution to shareholders.

The Fund will make distributions of dividends, if any, at least monthly, and of capital gains, if any, annually, typically in December. Dividends of net investment income and distributions from the Fund's net short-term capital gains are taxable to you as ordinary income. Distributions from the Fund's net capital gain (the excess of its net long-term capital gains over its net short-term capital losses) are generally taxable to non-corporate shareholders at rates of up to 20%, regardless of how long the shareholders held their respective shares in the Fund. Because a significant portion of the Fund's income is derived from interest rather than dividends, it is generally expected that only a limited portion of its distributions may be eligible to be treated as qualified dividend income (subject to reduced tax rates for non-corporate shareholders) or for the dividends-received deduction for corporate shareholders. You will be taxed in the same manner whether you receive your dividends and capital gain distributions in cash or reinvest them in additional Fund shares. The Fund will only be eligible to pass through to shareholders the tax-exempt character of its income from debt obligations that generate interest exempt from U.S. federal income tax if at least 50% of the value of the Fund's total assets at the close of each quarter of its taxable years consists of such debt obligations. It is not anticipated that the Fund will be eligible to distribute exempt-interest dividends to shareholders.

A RIC that receives business interest income may pass through its net business interest income for purposes of the tax rules applicable to the interest expense limitations under section 163(j) of the Code. A RIC's total "Section 163(j) Interest Dividend" for a tax year is limited to the excess of the RIC's business interest income over the sum of its business interest expense and its other deductions properly allocable to its business interest income. A RIC may, in its discretion, designate all or a portion of ordinary dividends as Section 163(j) Interest Dividends, which would allow the recipient shareholder to treat the designated portion of such dividends as interest income for purposes of determining such shareholder's interest expense deduction limitation under Section 163(j). This can potentially increase the amount of a shareholder's interest expense deductible under Section 163(j). In general, to

be eligible to treat a Section 163(j) Interest Dividend as interest income, you must have held your shares in the Fund for more than 180 days during the 361-day period beginning on the date that is 180 days before the date on which the share becomes ex-dividend with respect to such dividend. However, such holding period requirements are generally not applicable to dividends declared by money market funds and certain other funds that declare dividends daily and pay such dividends on a monthly or more frequent basis. Section 163(j) Interest Dividends, if so designated by the Fund, will be reported to your financial intermediary or otherwise in accordance with the requirements specified by the Internal Revenue Service ("IRS").

A tax of 3.8% applies to all or a portion of net investment income of U.S. individuals with income exceeding specified thresholds, and to all or a portion of undistributed net investment income of certain estates and trusts. Net investment income generally includes for this purpose dividends and capital gain distributions paid by the Fund and gain on the redemption of Fund shares.

Any dividend or capital gain distribution paid by the Fund has the effect of reducing the NAV per share on the ex-dividend date by the amount of the dividend or capital gain distribution. You should note that a dividend or capital gain distribution paid on shares purchased shortly before that dividend or capital gain distribution was declared will be subject to income taxes even though the dividend or capital gain distribution represents, in substance, a partial return of capital to you. This is known as "buying a dividend" and generally should be avoided by taxable investors.

Although distributions are generally taxable when received, certain distributions declared in October, November, or December to shareholders of record on a specified date in such a month but paid the following January are taxable as if received in December of the year in which the dividend is declared.

The Fund (or its administrative agent) will send you a report annually summarizing the amount and tax aspects of your distributions.

The Fund must withhold as backup withholding a percentage of your taxable distributions and redemption proceeds if you (1) have provided the Fund either an incorrect tax identification number or no number at all, (2) are subject to backup withholding by the IRS for failure to properly report payments of interest or dividends, (3) have failed to certify to the Fund that you are not subject to backup withholding, or (4) have not certified to the Fund that you are a U.S. person (including a U.S. resident alien). The backup withholding rate is 24%. Backup withholding will not, however, be applied to payments that have been subject to the 30% withholding tax applicable to shareholders who are neither citizens nor residents of the United States.

The Fund will be required to report to the IRS all distributions of taxable income and capital gains as well as gross proceeds from the redemption of Fund shares, except in the case of exempt shareholders, which includes most corporations. The Fund will also be required to report tax basis information for such shares and indicate whether these shares had a short-term or long-term holding period. If a shareholder has a different basis for different shares of the Fund in the same account (e.g., if a shareholder purchased shares in the same account at different times for different prices), the Fund calculates the basis of the shares sold using its default method unless the shareholder has properly elected to use a different method. The Fund's default method for calculating basis is the average cost basis method, under which the Fund averages the purchase price of acquired shares. A shareholder may elect, on an account-by-account basis, to use a method other than the average cost basis method by following procedures established by the Fund or its administrative agent. If such an election is made on or prior to the date of the first exchange or redemption of shares in the account and on or prior to the date that is one year after the shareholder receives notice of the applicable Fund's default method, the new election will generally apply as if the average cost method had never been in effect for such account. Shareholders should consult their tax advisors concerning the tax consequences of applying the average cost method or electing another method of basis calculation. Shareholders also should carefully review any cost basis information provided to them and make any additional basis, holding period or other adjustments that are required when reporting these amounts on their federal income tax returns.

If you sell, exchange, or redeem your Fund shares, it is considered a taxable event and will generally result in capital gain or loss if you hold your Fund shares as a capital asset. Capital gain or loss realized upon a sale or

exchange of Fund shares held for twelve months or less is generally treated as short-term capital gain or loss, except that any capital loss on the sale of Fund shares held for six months or less is treated as long-term capital loss to the extent that capital gain dividends were paid with respect to such Fund shares and disallowed to the extent that exempt-interest dividends were paid with respect to such Fund shares. You are responsible for any tax liabilities generated by your transaction. The Code limits the deductibility of capital losses in certain circumstances.

To the extent the Fund invests in foreign securities, it may be subject to foreign withholding taxes with respect to dividends or interest the Fund received from sources in foreign countries.

Additional information concerning taxation of the Fund and its shareholders is contained in the SAI. If you have a tax-advantaged retirement account, you will generally not be subject to federal taxation on any dividends and capital gain distributions until you begin receiving your distributions from your retirement account. **You should consult your own tax advisor concerning federal, state and local tax effects of your investment in the Fund.**

DISTRIBUTION ARRANGEMENTS

Additional Payments to Dealers

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Distributor

Quasar Distributors, LLC, a wholly-owned broker-dealer subsidiary of Foreside Financial Group, LLC, is located at Three Canal Plaza, Suite 100, Portland, Maine 04101, and is the distributor for the shares of the Fund. Quasar is a registered broker-dealer and a member of the Financial Industry Regulatory Authority. Shares of the Fund are offered on a continuous basis.

Service Fees – Other Payments to Third Parties

The Advisor, out of its own resources, and without additional cost to the Fund or its shareholders, may provide cash payments or non-cash compensation to financial intermediaries who sell shares of the Fund. These additional cash payments are generally made to intermediaries that provide shareholder servicing, marketing support and/or access to sales meetings, sales representatives and management representatives of the intermediary. Cash compensation may also be paid to intermediaries for inclusion of the Fund on a sales list, in other sales programs or as an expense reimbursement in cases where the intermediary provides shareholder services to the Fund's shareholders. The Advisor may also pay cash compensation in the form of finder's fees that vary depending on the Fund and the dollar amount of the shares sold.

ADDITIONAL INFORMATION

Inactive Accounts

The Fund is legally obligated to escheat (or transfer) abandoned property to the appropriate state's unclaimed property administrator in accordance with statutory requirements. The investor's last known address of record determines which state has jurisdiction. Your mutual fund account may be transferred to your state of residence if no activity occurs within your account during the "inactivity period" specified in your state's abandoned property laws.

Fund Mailings

Statements and reports that the Fund sends to you include the following:

- Confirmation statements (after every transaction that affects your account balance or your account registration);
- Annual and semi-annual shareholder reports (every six months); and
- Quarterly account statements.

It is important that the Fund maintain a correct address for each investor. An incorrect address may cause an investor's account statements and other mailings to be returned to the Fund. Based upon statutory requirements for returned mail, the Fund will attempt to locate the investor or rightful owner of the account. If the Fund is unable to locate the investor, then they will determine whether the investor's account can legally be considered abandoned. Investors with a state of residence in Texas have the ability to designate a representative to receive legislatively required unclaimed property due diligence notifications. Please contact the Texas Comptroller of Public Accounts for further information.

Householding

In an effort to decrease costs, the Fund intends to reduce the number of duplicate prospectuses, proxy statements and other shareholder documents you receive by sending only one copy of each to those addresses shared by two or more accounts and to shareholders the Transfer Agent reasonably believes are from the same family or household. Once implemented, if you would like to discontinue householding for your accounts, please call toll-free at 877-BRAMS18 or 877-272-6718 to request individual copies of these documents. Once the Transfer Agent receives notice to stop householding, the Transfer Agent will begin sending individual copies thirty days after receiving your request. This policy does not apply to account statements.

General Policies

Some of the following policies are mentioned above. In general, the Fund reserves the right to:

- Refuse, change, discontinue, or temporarily suspend account services, including purchase, or telephone redemption privileges, for any reason;
- Reject any purchase request for any reason. Generally, the Fund will do this if the purchase is disruptive to the efficient management of the Fund (due to the timing of the investment or an investor's history of excessive trading);
- Delay paying redemption proceeds for more than seven calendar days after receiving a request under the circumstances described below; and
- Reject any purchase or redemption request that does not contain all required documentation and is not in good order.

Before redeeming recently purchased shares, please note that if the Transfer Agent has not yet collected payment for the shares you are redeeming, it may delay sending the proceeds until the payment is collected, which may take up to fifteen calendar days from the purchase date. This delay will not apply if you purchased your shares via wire payment. Furthermore, there are certain times when you may be unable to redeem the Fund's shares or receive proceeds. Specifically, the Fund may suspend the right to redeem shares or postpone the date of payment upon redemption for more than seven calendar days for:

1. any period during which the NYSE is closed (other than customary week-end and holiday closings) or trading on the NYSE is restricted;
2. any period during which an emergency exists as a result of which disposal by the Fund of securities owned by it is not reasonably practicable or it is not reasonably practicable for the Fund fairly to determine the value of its net assets; or
3. such other periods as the SEC may permit for the protection of the Fund's shareholders.

If you did not decline telephone options on the account application or in a letter to the Fund, you may be responsible for any fraudulent telephone orders as long as the Fund has taken reasonable precautions to verify your identity. Before executing an instruction received by telephone, the Transfer Agent will use reasonable procedures to confirm that the telephone instructions are genuine. The telephone call may be recorded and the caller may be asked to verify certain personal identification information. If the Fund or its agents follow these procedures, they cannot be held liable for any loss, expense or cost arising out of any telephone redemption request that is reasonably believed to be genuine. This includes fraudulent or unauthorized requests. If an account has more than one owner or authorized person, the Fund will accept telephone instructions from any one owner or

authorized person. In addition, once you place a telephone transaction request, it cannot be canceled or modified after the close of regular trading on the NYSE (generally, 4:00 p.m., Eastern Time).

FINANCIAL HIGHLIGHTS

Financial information is not available because the Fund had not commenced operations prior to the date of this Prospectus.

PRIVACY NOTICE

The Fund collects non-public information about you from the following sources:

- Information we receive about you on applications or other forms;
- Information you give us orally; and/or
- Information about your transactions with us or others

We do not disclose any non-public personal information about our customers or former customers without the customer's authorization, except as permitted by law or in response to inquiries from governmental authorities. We may share information with affiliated and unaffiliated third parties with whom we have contracts for servicing the Fund. We will provide unaffiliated third parties with only the information necessary to carry out their assigned responsibilities. We maintain physical, electronic and procedural safeguards to guard your personal information and require third parties to treat your personal information with the same high degree of confidentiality.

In the event that you hold shares of the Fund through a financial intermediary, including, but not limited to, a broker-dealer, bank, or trust company, the privacy policy of your financial intermediary would govern how your non-public personal information would be shared with unaffiliated third parties.

FOR MORE INFORMATION

You can find more information about the Fund in the following documents:

Statement of Additional Information

The SAI provides additional details about the investments and techniques of the Fund and certain other additional information. A current SAI is on file with the SEC and is incorporated into this Prospectus by reference. This means that the SAI is legally considered a part of this Prospectus even though it is not physically within this Prospectus.

Annual and Semi-Annual Reports

Additional information about the Fund's investments will be available in the Fund's first annual and semi-annual reports to shareholders and in Form N-CSR. In the annual report (when available), you will find a discussion of the market conditions and investment strategies that significantly affected the Fund's performance during its last fiscal year. In Form N-CSR, you will find the Fund's annual and semi-annual financial statements (when available).

The SAI, shareholder reports, and other information such as the Fund's financial statements will be available free of charge on the Fund's website at www.bramshillfunds.com. You can obtain a free copy of the SAI and shareholder reports, request other information, or make general inquiries about the Fund by calling the Fund at 877-BRAMS18 or 877-272-6718 or by writing to:

BHILL Fund
